---

They're marketed as "Solar Generators" or "Solar Power Stations" but what they are is a nice box with a battery, charge controller, and inverter inside.

Repowering is the process of revitalizing and modernizing an existing photovoltaic plant. Instead of building a new facility from scratch, repowering seeks to optimize and improve the power generation ...

Determine the solar access for the site or determine a position where the solar has the most available sunlight (refer to Off-grid PV Power System Design Guidelines section 12).
