Charging Infrastructure: The driving range of electric vehicles has been improving steadily, with many modern EVs offering ranges that supersedes the square footage of this country. However, it's ...

Located in key areas across the island--Rodney Bay, Dennery, Vieux Fort, and Soufriere--these stations are ready to help electric vehicle owners charge up and hit the road.

Charging your electric vehicle is now more convenient than ever, thanks to the launch of St. Lucia Electricity Services Limited"s (LUCELEC) new EV charging stations.

The project calls for the construction of photovoltaic shelters and 2 charging stations, in Castries, at the Ministry of Infrastructure car park. Some electric vehicles will also be purchased.

Historical Data and Forecast of Saint Lucia Electric Vehicle Charging Infrastructure Market Revenues & Volume By DC Fast Charging Network for the Period 2021-2031

LUCELEC has installed a 50kW DC fast charger, a 22kW AC charger and six 11kW AC chargers with average charge times ranging from 20 minutes to seven hours. The charge time varies ...

With the transport sector being one of Saint Lucia"s largest consumers of energy on island, the project is targeted towards the integration of electric mobility within a wider effort towards a sustainable, low ...

To support this growth, the government is laying the groundwork for a National Charging Network, inviting private investment to expand access to charging infrastructure across the country.

The new EV chargers are strategically installed across the island to support and encourage the adoption of electric vehicles in Saint Lucia and are live and ready for use.
