By delivering stored power when it is most needed, the Seguro storage project provides flexibility that will be critical to helping the San Diego region meet its decarbonization goals and California achieve ...

Built in about six months, it and a smaller, 7 MW battery provide daily ramping and peak shaving services for San Diego Gas & Electric -- services typically delivered by gas generators.

"This landmark energy storage project continues a long collaboration between the Energy Commission and the military to bring emerging clean technologies to maturity and help reduce ...

In 2017, a 30 MW/120 MWh lithium battery energy storage project was constructed in Escondido, near San Diego by San Diego Gas & Electric (SDG& E). This project was proposed as an energy storage ...

SDG& E has been rapidly expanding its battery energy storage and microgrid portfolio. We have around 21 BESS and microgrid sites with 442 megawatts (MW) of utility-owned energy storage ...

The project is named Top Gun, in honor of the famed naval aviation training program by the same name, previously located at Marine Corps Air ...

SDG& E's utility-owned battery storage portfolio is expected to reach nearly 480 MW of power capacity and over 1.9 GWh of energy storage by year-end, including the Westside Canal ...

Arevon is building an energy storage project in the Barrio Logan community of San Diego to support local energy reliability and maximize the use ...

The Peregrine project dispatches on-demand power when it is needed most in the San Diego area, helps keep peak energy prices stable, and reduces brownouts and blackouts.

San Diego Lead Carbon Energy Storage Project

Discover how UC San Diego's Energy Storage Group is driving the future of renewable energy with cutting-edge research in battery storage, microgrids, and carbon removal.
