Two of the Nordic country's biggest battery energy storage projects have been announced just days apart.

The status of these energy storage technologies in Finland will be discussed in more detail in the next sub-sections, giving a better understanding of the current and potential role of these ...

Is energy storage a viable option in Finland? This study reviews the status and prospects for energy storage activities in Finland. The adequacy of the reserve market products and balancing capacity in ...

Norwegian state-owned utility Statkraft said on Wednesday it had signed a power purchase agreement (PPA) for two battery energy storage systems (BESS) developed by Sweden's ...

Several parameters are influencing the development of energy storage activities in Finland, including increased VRES production capacities, prospects to import/export electricity, investment aid, ...

(Oslo/Espoo, 25 February 2026) Statkraft and Swedish developer OX2 have signed a seven-year, 235-MW battery energy storage agreement in Finland. This is Statkraft's largest BESS PPA in the ...

The energy storage facility delivered by Merus Power to Lappeenranta, Finland, has been completed and put into market use on 15 May 2025. The energy storage facility is owned by a ...

products and balancing capacity in the Finnish energy system are also studied and discussed. The review shows that in recent years, there has been a notable increase in the deployment of energy ...

Polar Night Energy is a Finnish company developing high-temperature thermal energy storage systems for wind and solar power. Its patented Sand Battery technology enables a significant ...

Discover how Finland is leading Europe's energy storage innovation to balance renewable integration and

Scale of new energy storage power stations in Finland

industrial demand. This guide explores cutting-edge technologies, market trends, and practical ...
