Would you install solar panels again if you moved home?

Connect panel members who have solar panels - and most were very positive about theirs. In fact, 80% said that they would be likely to install solar panels again if they moved home. Here are the top five reasons that persuaded our survey respondents to invest in solar power for their homes. Find out how much solar panels cost. 1.

Are solar panels a good option for your home?

Residential solar panels allow you to pull less energy from the grid. With the addition of solar batteries, solar panels could make your home self-reliant and independent from the electric grid. Solar batteries store energy created during sunny hours, allowing it to be used at night or on cloudy days.

Can a solar panel installer take my old solar panels off?

Under EU regulations, your solar panel installer is legally obliged to take your obsolete solar panels off you at no cost - that's right, it shouldn't cost you a penny. They'll take your old panels to a designated collection facility before the panels go on to a recycling plant.

Should you install solar?

"It depends on what is motivating the household to make the decision to [install] solar," Becca Jones-Albertus, director of the US Department of Energy Solar Energy Technologies Office, told CNET. If you're looking to be 100% energy independent or live off the grid, solar could be a good way to reach those goals.
