Why should you install solar panels in Singapore?

Solar films soar in Singapore's tropical climate to block harmful UV rays and reduce heat buildup. Whether the film is installed on the windows of homes, offices, or cars, it improves comfort, minimises energy costs, and protects from sun damage. 1. Heat Rejection: Keeping Interiors Cool with the right solar energy solutions.

How long does solar film last in Singapore?

Singapore's weather tends to be more tropical, capered by damp air, bountiful sunshine, and rains, which can impact the lifespan of solar film. Nonetheless, glass can be maintained for many years, provided that the proper installation is coupled with fitting materials. 1. Average Lifespan of Solar Film

Does SSG offer low e coated solar control glass?

SSG offers a wide range of Low E coated solar control glass, which comes in various colours, solar control and light transmittance. A Low E coating applied via chemical vapour deposition is commonly referred to as a "hard coat", whilst a Low E coating applied via magnetron sputtering is known as a "soft coat".
