What is a server rack?

A server rack is an essential component of any modern data center infrastructure. It is a standardised cabinet system used to house and organise servers, switches, routers, storage arrays, and other equipment. Server racks are available in various heights, widths, and depths and can be customized to meet a data center's specific needs.

What are enclosures & server racking?

Enclosures and server racking are equipment housing solutions within any industrial and commercial work place. Products such as enclosures, general purpose enclosures, server racks and server cabinets protect technical and electrical equipment.
