With accelerated upgrades underway in 2023 and 2024, Telekom Slovenije expects to modernize nearly two-thirds of its 1,500 base stations. This initiative has already boosted the overall ...

Explore expert insights on 5G regulation in Slovenia, including deployment, spectrum licensing, and cybersecurity. Stay informed with CMS's detailed resource.

The document will be updated with new knowledge in the field of cost efficiency and access to 5G radio spectrum and will be as such a real tool that will optimize the connectivity in the Republic of Slovenia.

Telekom Slovenije is expanding its 5G network coverage across Slovenia. In the last three months, it has rolled out 5G to 200 new locations across the country, increasing coverage from 65% to over ...

In this paper, we conducted a systematic mapping study that covers the literature published between January 2012 and December 2019 regarding using 5G in smart cities.

Our gradual 5G rollout strategy, launching 5G on 2600 MHz band as a first step, is the best choice with best possible rollout of coverage and capacity in 2020 and beyond.

Telekom Slovenije announced it is the first operator in Slovenia to launch a 5G network nationally, using existing base stations and the 2600 MHz frequency spectrum it already uses for 4G.

Telekom Slovenije upgrades its core network to prepare for 5G Standalone (5G SA) and aims to achieve 99% population coverage by year-end.

In this study, the idle space of the base station's energy storage is used to stabilize the photovoltaic output, and a photovoltaic storage system microgrid of a 5G base station is ...

Slovenia State Power Investment Corporation Smart City 5G base station

Telekom Slovenije is now delivering Slovenia's first commercial 5G services via its 2600MHz spectrum. The deployment involved 150 base stations, which are currently able to provide ...
