U.S. solar and energy storage are poised for significant growth in 2025. Explore the trends driving this transformation today!

In this blog, we'll cover what is driving the unprecedented growth of the energy storage sector, address challenges the industry needs to navigate, ...

The U.S. energy storage industry installed a record-shattering 57.6 gigawatt-hours (GWh) of new capacity in 2025, the largest single year of new battery capacity additions on record. Despite ...

Detailed info and reviews on 100 top Energy Storage companies and startups in United States in 2026. Get the latest updates on their products, jobs, ...

Standalone energy storage made up nearly 30 GWh of the new capacity added in 2025, while systems paired with solar accounted for 20 GWh. Residential storage grew substantially, ...

That's because energy storage balances and maximizes the benefits of low-cost solar while supporting traditional power plants like gas and coal, helping them ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

The residential energy storage sector added 3.1GWh in 2025, marking a 51% year-on-year increase.Expansion of virtual power plant programs in states such as Massachusetts, Texas, ...

Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.
