---

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

The International Energy Agency projects significant growth for photovoltaics (PV) in 2024 over the record-breaking year in 2023. Over the next ...

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027.

Europe's market for power generation holds a significant share owing to the growing installation of solar and wind power projects. The U.K. market ...

Our study defines the global solar energy market as all grid-tied and certified off-grid photovoltaic (PV) and concentrated solar power (CSP) plants ...

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects ...

Solar PV accounts for almost 80% of the global increase, followed by wind, hydropower, bioenergy and geothermal. In more than 80% of countries worldwide, renewable power capacity is set to grow faster ...

As one of the most scalable and rapidly deployable renewable technologies, solar power is pivotal in enhancing energy access, reducing emissions, and ...

Current, comprehensive coverage of the Solar Power Generation Industry. Includes: industry forecasts, trends, financial information & detailed analysis. Updated 11/24/2025.

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third

# Solar energy sector Power generation sector

quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...
