What are solar rebates & incentives?

Rebates and incentives are a crucial way to encourage broader adoption of solar energy and full home electrification across the country. These incentives will typically come from your utility, state government, or the federal government in the form of tax credits, property tax abatements, one-time rebates, or performance-based rebates.

How do solar incentives work?

Lowering the cost of going solar helps more people in your community go solar, which supports clean air, a more resilient energy grid, lower energy prices, and lower fossil fuel emissions. Related: Solar Rebates by State
The concept of solar incentives is simple: Reduce the cost of solar to make clean energy accessible to more people.

Where can I find a solar incentive?

Odds are you can find at least one solar incentive through your state, local government, or utility company. But, some states go above and beyond to encourage homeowners to go solar. Did you find this page helpful?
