Are solar panels a good option for a rental property?

Solar panels can be an energy-efficient solution for rental properties and can offer a consistent and long-term performance. When installed on a rental property, solar panels contribute to reducing the property's carbon footprint and reliance on non-renewable energy sources.

What if I can't install solar panels on my rental property?

Community solar is another excellent option for renters who cannot install solar panels on their rental properties. Community solar projects, also known as solar gardens or solar farms, are large off-site solar installations shared by multiple subscribers.

What is a fully solar powered house?

A fully solar powered house is a residential property that generates 100% of its electricity needs through solar panels and battery storage systems, operating independently from the traditional electrical grid or using it only as backup.

Can solar panels be depreciated on a rental property?

Generally, solar panels installed on a rental property can be depreciated as a capital improvement, allowing you to recover some of the installation cost and reduce your tax liability. This is typically done by spreading the cost of the solar panels over their useful life, according to the tax laws in your jurisdiction.

Installing solar panels is a great way to reduce your electricity bill and carbon footprint. But if you're leasing or renting a home and want to go solar, what are your options? Although it can ...
