How many solar roofs will Israel have by 2030?

Israel's Ministry of Energy and Infrastructure says its 100,000 Solar Roofs Program aims to add 1.6 GW of new solar capacity by 2030. Israel's Ministry of Energy and Infrastructure is targeting the addition of 100,000 solar rooftop arrays in the country by the end of this decade.

Should Israel install solar panels?

"Installing solar panels allows roof owners to enjoy additional financial income and consume electricity during emergency hours, and it increases the energy security of the State of Israel, while producing non-polluting electricity for the benefit of the health of all citizens," said Minister of Energy Eli Cohen.

How much solar energy does Israel need?

The 100,000 target, equivalent to 15% of Israel's residential rooftops, is expected to add 1.6 GW to the country's solar energy supply.

How many residential buildings in Israel have gone solar?

Only a handful of residential buildings in Israel have gone solar due to multiple obstacles, one of which is that a residents' committee cannot secure a bank loan. An apartment building fitted with solar panels (but not storage) in the southern city of Beersheba, through the Sun for All initiative. (Yuval Pan)

The Ministry of Energy and Infrastructure in Israel has launched a new target for the country to install 100,000 new rooftop solar systems by 2030 under the Solar Roofs program to ...

In a bid to expand its renewable energy sector and meet growing electricity demand, Israel is encouraging its citizens to install solar panels on their rooftops, allowing them to generate ...

Israel's Ministry of Energy and Infrastructure says its 100,000 Solar Roofs Program aims to add 1.6 GW of new solar capacity by 2030.

According to an evaluation published by the solar installation comparison platform GreenDays in Globes, rooftop solar installation costs range from 45,000 to 90,000 new shekels ...

Solar panels installed on rooftops in Israel

Israel launches a new rooftop solar program in 2025, aiming to add 1.6 GW of capacity by 2030. Learn how this initiative will lower electricity prices for residential and commercial users.

Generous subsidies for rooftop solar panels means that all electricity consumers will receive higher electricity bills.

Energy Minister Eli Cohen told a press conference in Jerusalem that solar panels promised a return on investment of at least 15% annually over 25 years.

"Every year, tens of thousands of rooftops are built in Israel, with enormous untapped potential for rooftop solar panels to generate electricity from the sun," said Tali Kadmi, Coordinator ...

From December 11, 2025, the regulation comes into effect making the installation of rooftop solar panels on new houses mandatory to receive a building permit for new houses and some towers.

The 100,000 target, equivalent to 15% of Israel's residential rooftops, is expected to add 1.6 GW to the country's solar energy supply. Minister of Energy Eli Cohen emphasized that installing ...
