California's aggressive shift from nuclear power to mandated wind and solar energy has led to significant challenges in electricity reliability and cost.

Uncover the scientific realities of solar farms, examining their complex environmental and operational considerations.

Sadly, this wasn't possible and a giant of the solar electricity production world has fallen. In more positive news out of the solar sector, researchers at Stanford University believe they've got ...

Headlines have been circulating major news outlets around the impending closure of the Ivanpah Solar Power Facility, a \$2.2 billion project that began construction in 2010 and has been ...

From a solar road in France to a \$200bn solar facility in Saudi Arabia, the solar sector has its fair share of failed and struggling projects. JP Casey looks at four of the most disappointing solar ...

Ivanpah Solar Power Facility to Shut Down in 2026 After Years of Underperformance Breaking news - The massive concentrated-solar-thermal plant in California's Mojave Desert, known ...

One of the most ambitious solar projects in history is quietly heading for shutdown after just a decade of operation. The Ivanpah Solar Power Facility in California's Mojave Desert was once...

More than \$14 billion in clean energy investments in the U.S. have been canceled or delayed this year, according to an analysis released Thursday, as President Donald Trump's pending megabill has ...

The recent snow storm that overtook Texas reportedly crashed the state's wind and solar energy generators, leading to natural gas, coal, and nuclear providing most of the state's electricity.

Discover the story of the failed photovoltaic desert project. Learn from its lessons and avoid similar mistakes.
