What is energy output from solar?

The previous section looked at the energy output from solar across the world. Energy output is a function of power (installed capacity) multiplied by the time of generation. Energy generation is therefore a function of how much solar capacity is installed.

What percentage of electricity comes from renewable technologies?

This interactive chart shows the share of electricity that comes from renewable technologies. Globally, almost one-third of our electricity comes from renewables. Hydroelectric power has been one of our oldest and largest sources of low-carbon energy.

Is hydroelectric power still a renewable source?

Hydroelectric generation at scale dates back more than a century, and is still our largest renewable source—excluding traditional biomass, it still accounts for approximately half of renewable generation. However, the scale of hydroelectric power generation varies significantly across the world.

U.S. energy-related CO₂ emissions declined overall by less than 1%, or 23 million metric tons (MMmt), in 2024. Among end-use sectors, the most ...
