-----  
Why do you need a solar certification service?

Certification services help minimize the risk of failure and help ensure the safe operation of solar materials and components with compliance with established standards. Polymeric materials are essential to the fabrication of PV modules and used in critical components such as substrates, encapsulants, back sheets and adhesives.

How does CSA Group Test and certify PV modules?

Let CSA Group test and certify your PV modules in a way that combines our signature expertise, speed, and customer support. We test and certify PV racking and tracking systems--full or component certification--to comply with national and international standards, including ANSI/UL, CAN/CSA, and IEC.

What certifications do you provide for your company's PV components?

We provide testing and certification for your company's PV components based on all the relevant international norms, guidelines and quality requirements, such as IEC/EN 62852, IEC/EN 62790, EN 50618, as well as national and T&#220;V Rheinland 2PFG standards. Make sure your components have what it takes to perform safely and efficiently!

What is a PV design specialist (PVDs) board certification?

Our PV Design Specialist (PVDS) Board Certification recognizes the advanced experience and skill of PV system designers. This Board Certification demonstrates your proven ability to configure the mechanical and electrical design components of PV systems. To find out if you meet the eligibility requirements for this Board Certification, [click here](#).

Capability Solar Energy Testing, Inspection, and Certification Services Rely on our full-service testing, inspection and certification services for solar energy to support your products in the ...

CSA Group conducts photovoltaic product testing & certification. We offer standards solutions required to give your photovoltaic (PV) products access to North American and global markets. Customers will ...

Demonstrate the safe operation of your solar materials and components with our polymeric materials and pv module testing and certification services.

We offer comprehensive testing and certification solutions for photovoltaic (PV) modules and components.

# Solar support component certification

Through our in-depth expertise in the latest standards and state-of-the-art ...

Certification services help minimize the risk of failure and help ensure the safe operation of solar materials and components with compliance with established standards. Polymeric materials are ...

Moving with the times: solar PV panels This meant expanding its remit to specific industry programmes, such as that for solar photovoltaic (PV) panels, introduced in 2003, which offers access ...

The IECEE PV programme offers access to the world's most qualified testing laboratories for PV components, modules and systems. For this reason, major players in the solar market trust ...

Make sure your components for PV systems meet both quality and safety standards to ensure reliable and profitable solar technology for your customers. Establish your customer trust based upon tested ...

About PV Balance of System (BOS) testing BOS encompasses the testing and certification of a wide range of components such as solar PV inverters, cables, connectors, junction boxes, switches, PV ...

The Solar Heating System Inspector (SHSI) Board Certification recognizes individuals who have demonstrated the technical knowledge and skills necessary for inspecting solar heating systems for ...
