The storage containers utilize innovative solar energy storage technology, such as Lithium-ion batteries, to store excess solar energy generated during the day for use when needed, especially during power ...

Built with high-quality photovoltaic panels, the system provides reliable 100KW output while incorporating robust storage capabilities to ensure consistent power availability.

Container hoisting -> Track deployment -> Frame unlocking -> 60kW power station deployment completed in 1 hour. Compared with traditional power plants: save 90% installation time.
