The Swiss parliament has decided that in future solar panels must be installed on large roofs and facades. This obligation applies to new buildings with more than 300 square metres of...

At the center of the reform is Article 45a of the Swiss Energy Act (EnG), which mandates the installation of solar systems on all new buildings with more than 300 m² of usable roof or facade ...

The Swiss Spatial Planning Act stipulates that in construction as well as agricultural zones building permits are not required for "sufficiently unobtrusive" solar plants on roofs.

Swiss voters have approved a new electricity law designed to promote renewable energy, featuring mandatory photovoltaic systems on large buildings and new incentives for PV development.

The proposal seeks to require the installation of photovoltaic systems on nearly all new and existing buildings, though exemptions would apply to protected structures.

Explore the implications of current legislative developments in Switzerland, particularly regarding solar power plants within the country.

For such protected objects, a construction permit is always required for solar installations, even if otherwise solar installations are generally only subject to a reporting obligation.

About 68.72% of Swiss people have approved a new electricity law to accelerate renewable energy development. The law provides new incentives to develop PV. New buildings with ...

Since January 2024, a legislative push requires all new buildings over 300 square meters to be equipped with solar systems. This bold decision marks the beginning of an era where solar energy ...

Swiss buildings should be equipped with solar systems

In suitable areas, which the cantons must designate in consideration of nature and landscape conservation as well as agriculture, large solar panels and wind turbines should generally ...
