Battery storage systems are crucial for the energy transition. Find out how Swissgrid is driving forward their integration into the grid.

Spread across more than 20,000 square meters, the new campus will feature three main pillars: a utility-scale redox flow energy storage facility, a next-generation artificial intelligence (AI) ...

Microsoft has announced a massive \$400 million (CHF 320 million) investment in Swiss data centers specifically for cloud and AI operations. Google and Amazon are close behind, renting ...

Real estate developer ERNE Gruppe and architecture firm FlexBase are hoping to start construction on a data centre project in Switzerland next year, which will include a "non-flammable ...

The energy demand of data centers is not only a concern for the environment but also for the country's energy security. As the demand for energy continues to grow, Switzerland will need to ...

Almost a dozen powerful data centres have recently been built or are due to open in the next few years in Switzerland. A world without data centres has become unthinkable.

The project combines utility-scale storage with an AI data center and district heating network in an ambitious multi-use development. The Swiss developer started work this month on the ...

Global demand for storage capacity in data centres is growing rapidly, as it is in Switzerland. At the same time, need for energy is rising (both in absolute terms and relative to total energy consumption).

Swiss construction group Erne this week announced it was entering into a strategic partnership with FlexBase Group for the FlexBase Technology Center battery storage and AI data ...

Flexbase Group has broken ground on an 800 MW/1.6 GWh redox flow battery project in Laufenburg,

Switzerland data center energy storage

Switzerland, in what could become one of Europe's largest flow storage systems. The ...
