What happens if you connect a battery in a series?

Connecting batteries in series increases the voltage of a battery pack, but the AH rating (also known as Amp Hours) remains the same. To connect batteries in a series, a jumper wire connects a battery's negative terminal to another battery's positive terminal.

How do you connect a battery in a series?

To connect batteries in a series, a jumper wire connects a battery's negative terminal to another battery's positive terminal. This leaves you with a positive terminal at the beginning of the battery pack and a negative terminal at the end of the battery pack for your application.

What is a Legrand Battery Cabinet?

Universal battery cabinets for all three-phase Legrand UPS from 10kVA up to 800kVA power range. The Battery cabinet is designed to house standard VRLA Batteries of capacity range from 24Ah to 105Ah (C10).
