What are common complaints from neighbors about solar panels?

Complaints about glare and aesthetics are more common when installing solar panels, especially if you live in a residential estate or complex. Neighbors may also complain if they weren't aware that you were going to install solar panels.

Do solar panels affect property values?

Concerns may arise about the impact of solar energy installations on property values. While some individuals perceive solar panels as unattractive or disruptive, studies indicate that, on average, solar energy installations do not detract from property values and may even enhance them.

Can solar panels be installed on a listed building?

The solar panels must not be installed on a building that is a listed building, unless the panels are flush with the roof or integrated into the roof covering. If your solar panel installation falls within these parameters, your neighbours won't have any grounds to object.

Should you install solar panels on your roof?

Installing solar panels on your roof can be exciting, but it's important to consider potential neighbor complaints. Some neighbors may object to the installation due to concerns about glare and aesthetics, especially in residential areas.

The construction of taller, two-story homes can lead to a direct loss of backyard privacy for adjacent properties. This common issue leaves many homeowners feeling exposed in their own ...

In my opinion, if the tree was there before you installed the panels then you have no leg to stand on, even if the tree is simply growing taller each year and has begun to shadow your panels ...
