Fluence Energy, Inc. and Torch Clean Energy, a privately-held independent power producer, announced the Winchester project, a solar-plus-storage facility being developed by Torch ...

Torch's "Winchester" project will have 160 MW of solar and is expected to be online in 2027 to support regional grid balancing and forecast load growth, the company said.

Torch Clean Energy, backed by Morgan Stanley Infrastructure Partners, has developed over 1.2 GW of renewable assets nationwide and is expanding its footprint in the desert Southwest.

From cutting-edge solar and battery technology, to innovative financing and partnership models, our projects incorporate the best solutions the industry has to offer--and we're always adapting.

Two prominent players in the clean energy sector, Fluence Energy and Torch Clean Energy, are joining forces to deliver a massive solar-plus-storage project in Cochise County, Arizona.

Torch Clean Energy is developing the project and Fluence is providing the battery storage technology -- the Gridstack Pro 5000. The project delivery date is expected to be early ...

"Torch is excited to partner with Fluence to manufacture the energy storage system for our Winchester project," said Travis Haggard, President of Torch Clean Energy. "The Gridstack Pro ...

Torch Clean Energy says it has some 1,400 MW of generation capacity under development with 20+ utility-scale renewable energy facilities across seven states. Fluence reports it ...

The project, scheduled for delivery in early 2027, will integrate Fluence's advanced Gridstack Pro 5000(TM) energy storage platform with two 80 MW solar arrays, providing grid-balancing ...

Today, we dive into the innovative Winchester project by Torch Clean Energy in Arizona, exploring its role in

Torch Solar Power Generation

advancing clean energy, the integration of cutting-edge battery storage ...
