A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in funding to ...

This policy briefing explores the need for energy storage to underpin renewable energy generation in Great Britain. It assesses various energy storage technologies.

As the newest member of the Globe group, UK-based Greenworks Power offers advanced residential and commercial energy storage solutions. Committed to sustainability and innovation, we help ...

Battery storage forms a key part of the UK's journey to net zero, helping to modernise the national electricity grid and ensuring homes and businesses can be powered by green energy, even when the ...

While Britain is making progress with its storage infrastructure, other countries are scaling up rapidly. China has built huge pumped hydro stations and the US is deploying very large grid-scale ...

There has been a shift in the pipeline for current and future long duration electricity storage (LDES), from over 7.2GW in December 2023 to 10.5GW in May 2024. In January, the Government ...

Explore how battery energy storage systems are transforming the UK's energy landscape, enabling cleaner, smarter, and more reliable power solutions.

From mountainous pumped hydro to cutting-edge cryogenic and compressed air technologies, the UK is deploying a broad portfolio of energy storage solutions to ensure energy security, decarbonisation, ...

BESS helps by storing excess energy during high production and releasing it when demand is high or generation is low, ensuring a reliable power supply as the UK strives to become a ...

This Action Plan sets out a pathway towards deploying low carbon flexible capacity technologies like

UK Green Energy Storage Power Service

long-duration electricity storage, power carbon capture, usage and storage ...
