Swiss telecom service provider converts unused satellite dishes into "solar dishes", powering the data centre's rising energy needs, together with hydropower DC-optimized solar ...

Case Study Satellite dishes reused for solar power generation SWISS provider of integrated energy and building technology solutions, CKW, has transformed unused satellite dishes ...

A Swiss data centre has partly met its rapidly rising energy needs by converting old broadcast television equipment. CKW, which supplies integrated energy and building technology solutions, is behind the ...

As a result, SolarEdge's innovative DC-optimized inverter solution was used with Power Optimizers attached to the underside of every pair of solar panels. This enables the solar system to ...

Switzerland-based utility CKW has installed PV systems on disused satellite dishes at telecom company Leuk TDC's headquarters, using SolarEdge's DC-optimized inverters and power ...

Munich, Germany - 3 June 2025 - CKW, a leading Swiss provider of integrated energy and building technology solutions, has successfully transformed unused satellite dishes located on the premises ...

Old satellite dishes from the 1970s have been given a second life as modern solar installations. Swiss company CKW, in collaboration with SolarEdge and Leuk TDC, has launched a ...

Swiss integrated energy solutions provider CKW has transformed unused satellite dishes on the premises of Swiss telecom company Leuk TDC into cutting-edge solar installations. The ...

Information receiver become energy generator - this satellite dish is powering a data centre for Leuk TDC.

To address this, SolarEdge's innovative DC-optimised inverter solution was used with power optimisers

Use satellite dishes to generate solar power

attached to the underside of every pair of solar panels. This enables the solar system to mitigate the ...
