Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

This dual-purpose system combines solar energy production with agricultural land use, allowing crops and solar panels to coexist on the same property. Vatican City joins Albania, Bhutan, ...

The Vatican is now completely powered by a farm that sports solar panels to help shade-tolerant crops thrive. This new coupling of solar and agriculture is growing fast.

With the Apostolic Letter "Fratello sole," issued motu proprio, Pope Francis provides for the construction of an agrivoltaic plant in the extraterritorial zone of Santa Maria in Galeria, where ...

Discover how the Vatican is pioneering industrial-scale energy storage to balance heritage preservation with modern sustainability goals. This article explores innovative solutions tailored for historic ...

A solar panel system is being built on the 424 hectares of extraterritorial land in Ponte Galeria, which within a year will make the Holy See the first zero-emission state in the world.

Why the Vatican's Energy Transition Matters (Even If It's Tiny) a country smaller than New York's Central Park is building a solar farm that could power its entire population. Welcome to ...

The project aims to meet the full energy needs of both the Vatican State and Vatican Radio using solar technology integrated with agricultural activity.

Pope Francis has ordered the construction of a solar power plant to supply the Vatican's electricity needs. He did so with the apostolic letter in the form of Motu proprio Fratello Sole,...

To achieve his aim, solar panels will be installed on a Vatican-owned property outside Rome. The power

Vatican solar Energy Storage System

generated could supply all of Vatican City's energy needs.
