Why should you choose Austrian power grid?

Our specialists' top professional qualifications and high level of personal dedication help to guarantee a secure and uninterrupted supply of electricity around the clock, 365 days a year. As independent transmission system operator Austrian Power Grid (APG) is in charge of ensuring the security of the electricity supply in Austria.

Why can't I find a complete overview of power generation in Austria?

An up-to-date overview of the complete power generation in Austria (i.e. including those shares that are used downstream of the grid operator's meter to reduce consumption and are therefore not fed into the public grid) cannot be provided due to the insufficient database available at APG.

Who designed the Vienna International Centre?

The Vienna International Centre (VIC) was designed by the Austrian architect Johann Staberand inaugurated on 23 August 1979. Located on the banks of the River Danube, it is only a ten-minute ride by underground (U-Bahn) to Vienna's city centre.

How can Austria improve its energy infrastructure?

For Austria this involves large-scale expansion and restructuring of the electricity infrastructure as well as targeted investments in renewable energy sources and storage infrastructure.
