What qualifications do you need to be a solar installer?

Once you have the right electrical background, the key qualification for installers is a Level 3 award in the installation and maintenance of small-scale solar PV systems. This is the specialist training that takes you from "a general electrician" to "solar PV installer".

Do I need an electrician for a Level 3 solar PV course?

In practice, yes. You will need an electrician-level skill set to get the most from Level 3 solar PV course and to work safely on live systems. Most specialist courses, including ours, are aimed at practising electrical operatives rather than complete beginners. Logic4training's entry requirements for the Solar PV course include:

How do I become a solar PV installer?
