A guide to the One Big Beautiful Bill Act & its impact on federal solar incentives. Learn how phase-outs in 2026 affect energy projects.

No doubt, the loss of the tax credit makes it harder for people to connect to solar power, but state and utility incentives still significantly reduce the costs.

But while the solar tax credit was set to expire in 2032, the GOP tax bill accelerates that, eliminating the credit at the end of 2025. And homeowners aren't waiting to invest in solar until...

Homeowners have until December 31, 2025 to install solar panels and lock in the 30% federal tax credit--an average of \$9,000 in savings. A tax attorney EnergySage spoke with believes ...

But soon President-elect Donald Trump and fellow Republicans in Congress may try to reduce or eliminate government incentives that have driven much of that growth. That has potential ...

Federal tax credits for rooftop solar, heat pumps and other energy-efficient technologies are going away at the end of the year. Here's what consumers should know.

The sprawling Republican budget bill approved by the Senate Tuesday removes a proposed tax on solar and wind energy projects but quickly phases out tax credits for wind, solar and other renewable energy.

The US solar industry is grappling with heavy changes to energy industrial policy, as federal legislation removes incentives that were designed to accelerate the transition to renewables.

Yes, solar panels are still worth it for the vast majority of U.S. homeowners in 2026 and beyond, despite the end of the 30% federal solar tax credit for some systems. The primary financial driver is the cost ...

# Will new energy photovoltaic panels be eliminated

On July 4, 2025, the One Big Beautiful Bill (OBBB) was signed into law, officially ending the 25D federal solar tax credit for homeowners on December 31, 2025. Fortunately, homeowners haven't lost ...
