-----  
What is the wind energy technologies office?

The Wind Energy Technologies Office leads the nation's efforts to improve the performance, lower the costs, and accelerate the deployment of wind power technologies. Find answers to the most frequently asked questions about wind energy.

How does DOE support wind energy research & development?

The U.S. Department of Energy (DOE) has been a global leader in supporting critical wind energy research and development (R&D) for decades, helping usher in commercial wind energy production. This funding has contributed to the rise of today's wind energy sector. DOE's Wind Energy Technologies Office (WETO) funds wind energy R&D activities that

Where can I get a wind energy license?

Wind energy technologies available for licensing from U.S. Department of Energy laboratories and participating research institutions can be found on the DOE's Office of Energy Efficiency and Renewable Energy's Energy Innovation Portal.

What is a land-based wind energy project?

Land-based, utility-scale wind energy projects use highly efficient, state-of-the-art wind turbines that generate cost-competitive electricity at power-plant scales. They can be owned and run by a utility company that then sells the power the plant makes to users, like homeowners, who connect to the electrical grid.

We propose a management procedure model for Chinese wind power projects. The regulations stipulating wind power projects in China are analyzed. We research phases, goals and ...

Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in China.

At VOLTAGE Group, we specialize in comprehensive engineering services, focusing on the development, design, construction, commissioning, and maintenance of wind power projects.

To develop a wind power project includes many different steps and processes that can vary depending on the

# Wind Power Generation Project Department

preconditions; planning, acquisition of consents, agreements and contracts, financing, ...

WETO supports wind energy as an abundant, readily accessible resource that fosters economic prosperity, societal well-being, and energy security. Our R& D activities are aimed at ...

Wind power is the nation's largest source of renewable energy, with more than 150 gigawatts of wind energy installed across 42 U.S. States and Puerto Rico. These projects generate enough ...

These advisory consultancy services will assist CEB in ensuring engineering oversight of wind turbine installation, commissioning and testing activities, and technical certification of ...

The project construction began in 2021, and it entered into commercial operation by December 2021. The development involves Shanghai Electric Power and Shanghai Green Environmental Protection ...

Innovation in the design and manufacturing of wind power generation components continues to be critical to achieving our national renewable energy goals.
