-----

Through the four installation methods of hanging, pulling, hanging and bracing, the Flexible mounting solution can be installed freely in many directions, which can better improve the support method of ...

The contributions of this paper are as follows. A comprehensive field modal testing of the flexible PV support structure is conducted, obtaining its high-order modal parameters in the first time ...

The flexible photovoltaic support system can realize the large span of the suspension cable structure, reducing the amount of support steel and the number of support foundations, and greatly lowering ...

To better understand the structural behavior and prevent potential failure, this study presents a simplified analytical model for the design of double-layer flexible cable photovoltaic ...

Abstract The flexible support photovoltaic module structure system has advantages such as large span, fast construction speed, and suitability for complex environments. However, this kind ...

The invention discloses a photovoltaic flexible support system capable of resisting strong wind or typhoon, and belongs to the technical field of photovoltaic flexible supports.

The present application provides a flexible photovoltaic support and a photovoltaic system. The flexible photovoltaic support comprises first supports, second supports, spatial support...

To improve the span and stiffness and widen the application scene of the flexible photovoltaic support system, a new type of three-dimensional cable-truss flexible photovoltaic support system is proposed ...

In this paper, a new type of cable-truss support photovoltaic module structure system with excellent wind resistance is proposed. Firstly, the superiority of the new system is proved by the...
